

LAST:

The width of foot's sole changes from person to person, that's why our ski boots have different volumes to meet the needs of every skier.

Tecnica ski boots are divided into:

LV (low – from 93 to 98mm), **MV** (mid – from 99 to 100mm) and **HV** (high – 103mm).

LOW VOLUME
98 mm

MID VOLUME
100 mm

HIGH VOLUME
103 mm

LV: for skiers with narrow foot's sole or for those who prefer a more enveloping and precise fit

MV: for skiers with medium foot's sole or for those who prefer a regular fit

HV: for skiers with a wide foot's sole or for those who prefer a comfortable fit

FLEX:

Given the needs and level of every skiers, we project models with different flex, thanks to the combination of different plastics.

Tecnica ski boots are divided into:

HARD (flex **man** 140-120/**woman** 115-95), **MEDIUM** (flex **man** 110-90/**woman** 85-75) e **SOFT** (flex **man** 80-60/**woman** 65-55).

HARD: for expert and more robust skiers

MEDIUM: for intermediate and/or medium-sized

SOFT: for beginners or lighter skiers

SIZE GUIDE

THE RIGHT SIZE, FOR THE PERFECT FIT

- 1 Stand up, place your heel along the edge of the outline
- 2 Place the foot flat and mark the ends with a marker

ATTENTION

0 1cm 2cm 3cm 4cm 5cm

0 1in 2in

Before using the foot sizer, check that the print size is correct by measuring the scale with a ruler. If the print is not to scale, make sure the document is printed at 100% and without margins
